Olivia Genesis Foundation

# Genesis Group

Genesis Group is a diversified American oil & gas and environmental services company with headquarters in Houston Texas USA, and was founded in 1989.

Genesis has a global portfolio of conventional, alternative and renewable energy resource development opportunities.

Additionally, we have a network of proven energy related equipment and service providers and environmental technologies to remediate and recycle energy waste material to apply to our resource development opportunities.

With more than 200 years of combined experience, we can provide significant value to a wide range of energy investment opportunities.

# To Achieve Sustainable Growth

We have established an innovative and productive enterprise with a clear vision and a portfolio of sustainable, profitable and growing businesses.

**People:** Empower every person in our organization to achieve more and inspire them to be the best they can be.

**Partners:** Building a winning network of partners and nurturing mutual loyalty.

**Portfolio:** We are striving to be a part of the careful process of environmental management, oriented to the efficient handling of natural resources, maintaining a deep respect for the preservation of biological and cultural diversity.

**Success:** We are committed to maximizing the profitability and growth for our industry partners and shareholders.

# Genesis Is Focused On Seeking New Opportunities Throughout The Globe In:

HYDROCARBONS PRODUCTION

ADVANCED PETROPHYSICAL AND GEOPHYSICAL SERVICES

NEW ENVIRONMENTALLY SAFE TECHNOLOGIES AND PRACTICES

GLOBAL TRADING OF OIL & FUELS

We are committed to maximizing the profitability and growth for our industry partners and stockholders.

GENESIS WILL BE THERE FOR THE DURATION

### Oil and Gas Related Services & Technologies

As an innovative and productive enterprise with a balanced portfolio of sustainable, profitable and growing businesses, we are striving to be a part of the careful process of environmental management, oriented to the efficient handling of natural resources, maintaining a deep respect for the preservation of biological and cultural diversity.

Unconventional and alternative energy sources such as solar and geothermal technologies.

Drilling Waste Remediation & Recycling.

### Underground Coal Gasification

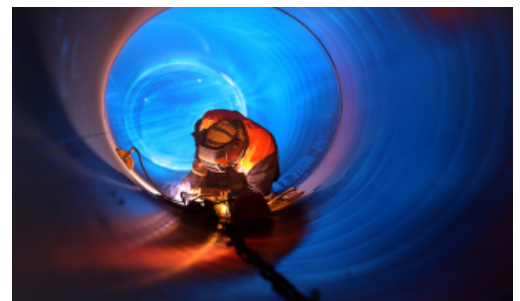

Genesis Underground coal gasification (UCG) refers to the process in which coal reacts in situ with an oxidant to produce a combustible gas, called synthesis gas or syngas. In contrast to surface coal gasification (SCG), no coal mining needs to take place and hence UCG has the potential to access unmineable coal.

### Infrastructure

Genesis provides high-speed pipeline construction technology and equipment to improve field pipelines and gathering lines, metering equipment, storage and processing facilities.

Butler Tech high speed pipeline construction technology and equipment.

### NuTech Technology

NuTech Technology is based on utilizing proprietary petrophysical technology for accurately locating and quantifying all producible reserves in new and/or depleted oil and gas fields.

#### NuLook™

NuLook® petrophysical evaluations are geared for finding pay zones. Every well presents challenges; mineral effected-low resistivity, fine grained-low contrast, water salinity, and even data quality.

#### NuLook Textural Vision™

NuLook Textural Vision analysis allows you to visualize pore size changes within the total and effective pore spaces in the reservoir.

#### NuSpec™ Services

NuSpec goes beyond Textural Vision and allows the NuLook® services to be performed with a defined minimum data set to give a pore size spectrum similar to a T2 distribution from NMR.

#### NuView Reservoir Vision™

NuView advanced 3D geological modeling techniques determine the extent and volumes of by-passed pay zones and lower the risks of development going forward allowing you to maximize well and field performance.

### Encryption Technology

Encryption and decryption of stored files. The SLD can have local storage such as a disk drive or an SSD.

When it is open for an authorized user it can be used for storage of data, clean or encrypted. The biometric serves both as a lock of the device and a base for the generation of encryption keys.

All encrypted data can be red only by authorized people. Applications: E-Banking, Government exchange of data, Enterprise security needs as well for the Journalists and News security (before publication).

### North Africa Gas Prospect

Genesis/IEVM has identified and verified several opportunities of varying risk levels below and near three existing producing fields located offshore North Africa.

With our access to all pertinent technical and commercial data, this is now presented as an additional component of the current European gas market development efforts by Genesis.

Using data collected from the original exploration well, Genesis/IEVM has identified two potentially very large, high pressure gas and condensate accumulations with some black oil.

The data available does show potential un-risked reserves estimated at approximately 35 and 55 billion cubic meters of gas (BCMG), equivalent to 1.25 and 1.95 trillion cubic feet of gas (TCFG) respectively plus 125 and 195 million barrels of condensate (MMBC), and an unidentified amount of black oil.

### Arizona Solar Project

Genesis Group intends to market solar panel technology to targeted customers including commercial properties, government, municipal and educational facilities and public utilities.

Additionally, Genesis intends to develop Solar Power Plants throughout the US marketplace with a targeted launch of three (3) 100 MW Solar Power Plants to be located in the Mohave Desert Region, USA in California, Arizona and Nevada. The project investment for these solar power plants is \$1.3 Billion Dollars (USD).

Genesis' stated mission is: To offer innovative yet cost effective solar solutions integrating photovoltaic's solar elements, forming comprehensive renewable energy systems, and managing electricity, human ecosystems, energy storage, power grid or off-grid applications.

# Financial Services

Genesis Group has an exclusive partnership with CCM Privee Ltd. of Tokyo, Japan and Abu Dhabi, UAE

CCM has strategically established a proprietary multi-asset online trading platform commissioned and managed inhouse by a team of skilled traders with years of experience. Their multi-faceted trading system represents a multimillion dollar investment in technology which is managed and operated privately by a select team of traders utilizing a 25% capital allocation of a private managed cash portfolio, the yields based on past performance indicate a conservative quarterly yield expectation of 250% of capital adding additional income gains through strategically targeted markets from around the world in high frequency in long or short trade opportunities”

# Mission Statement

The objectives of the Olivia Genesis Foundation is the prevention and treatment child abuse. To support parenting programs that reduce the risk of child abuse and neglect, and treatment programs that improve the social and emotional functioning of children and youth impacted by abuse and family violence.

Bring together leading research and treatment professionals, policy makers and community members to make sure every child has the opportunity to develop and grow in a safe, healthy, and nurturing environment.

Partner with policy makers, human service agencies, child advocacy groups and nonprofits locally and around the nation and globe to prevent child abuse and neglect and to treat victims of abuse and neglect. Provide the education, advocacy and clinical care. Be part of a game-changing, paradigm shift in the way we think about, talk about and treat child abuse and neglect.
